EXPERIENCE

Apr 2026 - Present	Founder / Builder VibeStartup • Building VibeStartup • Developing new AI products and experiments across agent workflows, developer tools, and applied intelligence
Jan 2026 - Apr 2026	API/Integration Architect AGI, Inc. • Interfaces and integration across API, SDKs, and partner-facing surfaces • MLE, agents, control plane and data architecture
Oct 2025 - Jan 2026	Software Engineer AGI, Inc. • Maintained and enhanced the our browser automation system, enabling scalable and reliable web interactions • Built infrastructure and desktop surfaces for autonomous Windows GUI control agents • Contributed on enterprise partnerships for desktop control
Apr 2025 - Oct 2025	Software Engineer Breezy • Designed and implemented the company's browser automation system, enabling scalable and reliable web interactions • Built an intelligent task extraction system to automate and streamline complex workflows • Developed and maintained the Next.js web frontend and Ruby on Rails backend for core product features
March 2025	Developer (IC) Exerton.XYZ • Designed and implemented a secure money transfer system using Solana blockchain • Implemented Web3 authentication system using Phantom wallet integration for secure user verification • Optimized gas fees through efficient smart contract implementation
Sept 2024 - Dec 2024	Applied ML Engineer (Intern) Deepshard • Worked alongside team of 8 other engineers to bring Truffle computer to its December 2024 launch • Implemented user interface components for the MacOS app and an endpoint for the website backend (itsalltruffles.com) • Built CAD models and ran simulations on occasions when we didn't have a hardware engineer
June 2024 - Present	Developer (IC) UTA College of Social Work • Helping interns complete MyAmble, a full stack PWA for social work surveys with real-time LLM-driven analyses
June 2024 - June 2024	Full-Stack Pipeline Engineer (IC) Flora Creative Systems • Worked alongside team of 10 other software engineers to build a node-based AI media editor • Implemented node editor drawing integration and user credit tracking refinement
Jan 2023 - May 2024	Independent Research & Development Human Robot, Midlothian, TX • Worked on Human Robot: a \$1,000 general-purpose humanoid robot prototype with full-scale articulation (not yet finished) • Engineered innovative low-pressure hydraulic systems, achieving 10x+ cost reduction in valves, actuators, and prime movers

- Designed for scalable manufacturing using welded plastic, CNC routed MDF, plasma cut sheet metal, and custom PCBs
- Conducted research in neurosymbolic AI, focusing on advanced control architectures for humanoid robots
- Pitched project to investors, including Z Fellows (top 10% applicant); received \$10k seed funding from aunt, Debra Morgan
- Developed comprehensive business plan targeting \$1000 price point with \$100/mo AI subscription
- Gained valuable experience in mechanical, robotics, and AI engineering as well as startup basics

June 2022 - Jan 2023

Software Engineer Motio Inc

- Developed Soterre for Qlik Sense
- Started as intern in June; full-time after August 16th 2022

June 2021 - May 2022

Student Research Assistant IT Lab, UTA

- Collaborated with research group to evolve and test a flask-based statistical visualization tool CoWiz (renamed as Dash)
- Developed full stack web server MLN-Dashboard using Next-React-GraphQL-Strapi stack

June 2021 - May 2022

Student Research Assistant UTA College of Social Work

- Maintained and enhanced multi-platform (iOS and Android) data collecting application MyAmble and web admin dashboard
- Stack: JavaScript, Firebase, Flutter (mobile), and Vue (admin dash)

May 2016 - Mar 2020

Crew Trainer McDonald's, Midlothian TX

- Led safety committee and addressed employees during 30-minute monthly safety meetings
- Trained employees on-the-job and formally
- In addition to 4 years of formal education, actively used Spanish on-the-job

EDUCATION

June 2020 - Aug 2022

B.S. Computer Science The University of Texas at Arlington, Arlington, TX

- GPA: 3.6/4.0

Sept 2014 - May 2018

A.A.S. in Mathematics Navarro College, Waxahachie, TX

- GPA: 3.9/4.0
- 85 hours completed
- Dual-credit program

PROJECTS

Feb 2019 - Present

Human Robot

- Began development of a full-scale humanoid robot prototype with 2 legs, 2 arms, 5 fingers per hand, supporting all major body articulations
- Integrated 3MP & 12MP dual cameras, stereo mics, stereo speakers, and various sensors
- Designed for fast, scalable manufacturing using mostly welded plastic, CNC routed MDF, plasma cut sheet metal, and off-the-shelf components
- Engineered custom PCBs and injection molded parts to minimize costs and optimize performance
- Achieved 10x+ cost reduction in low pressure hydraulic valve, actuator, and prime mover fabrication
- Pitched innovative robotics technology to investors including ZFellows, Inception Studio, Schematic Ventures, VibeCap, StarshipVC, Y Combinator, and 1517 Fund. Received \$10k seed funding from Debra Morgan (family)

	Developed comprehensive business plan targeting \$1000 price point with \$100/mo AI subscription
Oct 2021 - May 2022	MLN-Dashboard - Developed a full-stack Next.js web server for complex data visualization and analysis - Implemented modular architecture allowing easy integration of new data sources and visualization types - Utilized GraphQL for efficient data querying and Prisma for robust database management - Later began integrating Strapi CMS for improved content management and user interface customization
June - Aug 2021	20Q - Collaborated in a 4-person team to develop an Android app for the classic 20 Questions game - Implemented game logic and algorithm for app to guess user's thought based on responses - Utilized Java and Kotlin programming languages for Android development
Jan - May 2021	DesparadosAEye - Led a 5-person team as project manager, general app developer, and ML engineer - Implemented on-device conversational AI using Facebook's BlenderBot-small, compiled to TFLite format - Developed one of the first applications to use BlenderBot for on-device mobile chatting
May 2021 - Jun 2021	CookieCutter CNC - Designed and built a 2x2 plasma cutter CNC machine to automate sheet metal cutting process - Developed Windows software in C# to process SVG files and generate optimized path coordination code - Created Arduino firmware to interpret commands and control machine movements

SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, C#, Kotlin, VB6

Web Technologies: React, Next.js, GraphQL, Node.js, Vue.js, Flask

Database Systems: PostgreSQL, SQLite, Firebase

Data Science & Machine Learning: TensorFlow, Keras, PyTorch, BERT

Cloud Technologies: AWS, Firebase, Google Cloud Platform

DevOps & Version Control: Git, GitHub, Docker/Compose

Other Tools & Technologies: Android Development, Flutter, Blender, 3D Printing, CNC routing, PCB fabrication

CERTIFICATIONS

Feb 2022	AWS Certified Machine Learning - Specialty
Apr 2021	TensorFlow Developer Certificate
Oct 2020	DeepLearning.AI TensorFlow Developer Specialization
Mar 2019	AWS Certified Developer - Associate
Mar 2019	AWS Certified SysOps Administrator - Associate
Mar 2019	AWS Certified Solutions Architect - Associate

HONORS AND AWARDS

May 2018	Top 10 Graduate - Waxahachie Global High School
----------	--

Spring 2024	Top 10% Applicant - Z Fellows Program
Feb 2022	2022 Future Texas Business Legend Award Finalist
Apr 2022	Co-Author on Paper Accepted to Baltic DB&IS 2022 Conference
Sept 2021	Broaden and Build Conference Honorable Mention
Apr 2021	SCRF Honorable Mention + \$100 award
May 2013	20% Project Presentation Honorable Mention

LEADERSHIP EXPERIENCE

Jul 2018 - Mar 2020	Crew Trainer and Safety Committee Organizer McDonald's • Led Safety Committee and addressed employees during monthly safety meetings • Trained and mentored new employees both on-the-job and through formal sessions • Ensured compliance with safety protocols and procedures across all restaurant operations
Sept 2017 - Dec 2017	Biology Lab Group Leader General Biology I DC, Senior Year at WGHS • Initiated and organized a biology lab group to streamline activities for a new teacher • Authored and implemented a group contract outlining safety, task management, and communication protocols • Led the Coordinator's Committee, overseeing group instruction, appointing leads, and managing progress schedules

VOLUNTEER EXPERIENCE

2024 - April 2025	Founder and Operator GoHuman Fund (gohuman.fund) • Founded and operated a personally-financed global micro-seed fund that completed its mission in April 2025 • Deployed several thousand dollars across dozens of grants (typically \$100 initial checks) to support promising entrepreneurs and prodigies worldwide • Supported founders who achieved significant success, including Advik Kooper (raised funding from Peter Thiel's 1517 fund for Exerton), Sur Naik (\$20k Emergent Ventures grant), and Emma Obadoni (built 50+ member Tech Family helping Africans in tech) • Provided mentorship, networking opportunities, and emotional support to recipients across AI/ML, blockchain, hardware, SaaS, and other innovative fields
-------------------	---

ADDITIONAL INFORMATION

- Languages: English (Native), Spanish (Conversational)
- Interests: Neurosymbolic AI, Humanoid Robotics, Entrepreneurship/Investing, Full-Stack Development, 3D Printing, CNC Machining
